Empire City is a massive apocalyptic city where all those who live in it become born again. Sealing away the world from the sun was an act that seemed to have benefitted all of mankind. A 20 year long civil war followed but was soon succeeded by a new wave of infestations caused by supernatural and alien beings that escaped from after the world was sealed. A new empire was born and with the rise of the empire came corruption. Lives, homes and the natural world were ravaged, resources were scarce and the only solution was to grow more powerful by conquering. Now a series of catastrophes have risen up and swallowed the empire. Amidst the chaos a divine being appears, battling the corrupt in the belief that what once was can once again be saved. This divine being was supposed to be the saviour of mankind but the powers that be who are hell-bent on keeping the world corrupt will stop at nothing to find this divine being. Rave V Re: Dungeon Arena - Arena King's palace Rave LOL, I should have assumed you'd have no clue as to what side Dungeon Arena is on, but I guess I should have looked it up. On the server, I have a Yatogoro, who's really fun to play as, he's been stuck on defense for a good amount of time now, however my opponent does have a Zorah, which is a pain to defend against. If I pop him from time to time, I've managed to get the upper hand before. I won't say the timing is right for me against Zorah, though, because since I don't have a defense or a push tactic, the best I could do is tech him then zone him out. I find this mode more fun than the others because you need to be able to think creatively on your off-tactics, like taking control of Zorah just so I can push him out and AoE him to death. I'm probably more creative when I'm playing as a character that I enjoy playing as, hence the reason why Yatogoro's fun to play. 5-10-2011, 04:35 PM xBOK Re: Dungeon Arena - Arena King's palace Rave Why not just use the original idea with a more interesting mini-boss? Set your Rave area properly, add a ton of red berries (why red you can draw your own conclusion, but probably purple would have been even better) When your wilds catch up to your marker you will encounter a particular character, and they will bring a new item, a rare item of some sort, or a rare item in your season, such as an Event item, or a seasonal item. When dealing with the wilds ask them a question and if it's the character you want ask about his name. You could use the name of the wild as a character to ask questions. When dealing with a certain character have them ask a generic question, which is well answered by the wilds. Now when you meet the mini-boss, give it a real hard time, and as you gather battle power up items and life find you can use the wilds to zone out while healing/support with the rare.// // EvaluateExpression.swift // RxSwift // // Created by K

engaging and interactive experience. In Stockpile, players act as stock market investors at the end of the 20th century hoping to strike it rich, and the investor with the most money at the end of the game is the winner. Stockpile centers on the idea that nobody knows everything about the stock market, but everyone does know something. In the game, this philosophy manifests in two ways: insider information and the stockpile. Both of these mechanisms are combined with some stock market elements to make players consider multiple factors when selling a stock. Do you hold onto a stock in hopes of catching a lucrative stock split or do you sell now to avoid the potential company bankruptcy? Can you hold onto your stock until the end of the game to become the majority shareholder, or do you need the liquidity now for future bidding? Do you risk it all by investing heavily into one company, or do you mitigate your risk by diversifying your portfolio? In the end, everyone knows something about the stock market, so it all comes down to strategy execution. first expansion for Stockpile contains four expansion modules that can be played separately or used all together for more strategic game play. Module 1: Forecast Dice Six custom dice offer more excitement by changing the market forecast round-to-round. Roll the dice at the beginning of the round. The dice cause the market to rise or fall on any given turn and ensures that no two games will ever be the same. Module 2: Bonds Bond present a new, safe investment option for players. Purchasing bonds can provide a steady stream of interest payments every round. However, it comes at a price. The original money used to purchase bonds cannot be recovered until the end of the game. Be careful not to overspend or you might lose out on valuable stockpiles. Module 3: Commodities & Taxes Commodities & Taxes create much more tension during the game. Each round, players add Commodities or Taxes to the stockpiles. Collect different types of commodities and dodge taxes to earn substantial end-game bonuses. Module 4: More Investors Stockpile: **Continuing Corruption adds six**
