The technology is used across the game, such as to train new video modes and menus; provide feedback on the game's physics; and provide a foundation for player and team movements. To improve gameplay in the game's backpass system, 'Instant Saves' automatically store the last save you played at three points in time before you backpass. Instant Save provides quick saves as you are about to pass to your teammate or into your opponent's box, and a 'Delete Save' button, allowing you to quickly undo Instant Saves. The backpass system is also improved. When selecting a back pass to your teammates, the player of the ball rolls their pass back towards the player they are trying to pass to, and an interactive animation shows how your pass is travelling. Also, the back pass system is now more sensitive to pressure, meaning that players will not be forced off balance or lose control of the pass as they attempt to backpass with heavy pressure. In multiplayer action, the game offers online player matchmaking to help you find other players as well as to find friends with similar skill sets and attributes. In addition, the online player matchmaking is now more refined – out of game, you are able to select between Quick Match, Game Mode, Team Select and League. In Game Mode the game's intuitive Create a Game feature enables you to create customised games or scrimmages online to use to train new modes, start new leagues, or for your friends. A new Create a Game system also allows you to easily pick your type of game – Tourney, Leagues, Playground or Ranked. You can now choose the number of FUT Points to use in the game and change the number of players in your game, as well as configure the game length and choose the DLS Team and your Club as the Home Team. You can now enter a variety of new mode during your create game: Tournament, and choose between Tournaments and Leagues. Also, Leagues have a matchday team view and Coach view, allowing you to view the in-game stats of your team when you enter the match. The Leagues and Playoffs system is also improved and offers online leaderboards. The Leagues can be split into groups, and the top 10 players in each group at the end of the season are placed in the top of the
